# Siemplify

The #1 Vendor-Agnostic Security Operations Platform

The Siemplify Security Orchestration, Automaton and Response (SOAR) platform was purpose built to make security operations smarter, more efficient and more effective.

A complete security operations workbench, Siemplify makes analysts more productive, security engineers more effective and managers more informed about SOC performance.
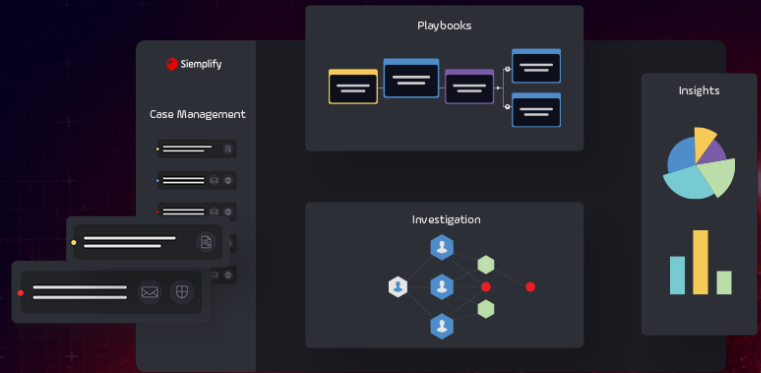

Platform Capabilities

Threat-Centric Case Management

Reduce caseload by as much as 80% by working prioritized case queue that automatically groups related alerts from across your detection tools.

Customizable Playbooks

Build customizable processes that automate everything from case enrichment to response with simple drag and drop.
Context-Driven Investigation

Instantly understand and visualize the who/what/when of a security incident by leveraging a patented contextual engine.

Crisis Management

Enables stakeholders inside and outside the SOC to streamline both tactical and strategic responses to a successful cyberattack.

Machine Learning Recommendations

Get smarter with every alert and analyst interaction and receive recommendations based on historical data to prioritize and investigate alerts more effectively.

Benefits:

- Reduce Alert Overload
- Automate Response Processes
- Integrate 200+ Security Tools
- Manage and Measure SOC Activity

Collaboration and Teamwork

Harness the full power of your team for faster, more efficient incident response. All interaction is captured in a central, easily searchable and readily auditable repository.

Real-time SOC Metrics and KPIs

Rise above the daily firefighting and drive continuous improvement by tracking and analyzing a wide range of SOC key performance indicators across people, process and technology.

Siemplify

The Siemplify Security Operations Platform

How it Works

ALERTS   THREAT-CENTRIC CASE CREATION   PLAYBOOK EXECUTION   CONTEXT-DRIVEN INVESTIGATION   RESPONSE   ANALYTICS FEED ML
A Security Operations Platform Like No Other

Unlike other SOAR products that focus primarily on automation or other narrow use cases, only Siemplify provides a complete security operations workbench that addresses the broadest set of needs and appeals to security analysts, engineers and managers alike.
What Sets Us Apart

A Vendor-Agnostic Platform

Rooted in deep secops expertise, Siemplify is vendor-agnostic and 100% focused so you can select the security tools that are right for you.
Threat-Centric Approach

Patented technology groups related alerts from across your detection tools to reduce caseload by as much as 80%.

Playbook Lifecycle Management

Reusable playbook blocks, playbook versioning and an intuitive drag and drop editor simplify playbook maintenance as you scale and mature your SOAR implementation.

Powerfully Simple

Siemplify combines powerful customization capabilities with an unrivaled intuitive analyst experience to make everyone in the SOC productive, not just expert engineers.

Trusted by the Best

From Fortune 500 firms to global MSSPs, Siemplify is the secret weapon behind several of the world's leading security teams.

"*Creating Playbooks with Siemplify is so easy, it almost feels like cheating.*"

Security Engineer, Fortune 500 Logistics Firm

"*Siemplify is handling 98% of our level one tickets. Our ability to scale has increased by a factor of 10*".

Brad Horsley, CTO Choice Solutions

"*My analysts love Siemplify. It allows them to automate repetitive tasks and focus on higher-level work.*"

Cameron Rayner, SOC Manager, Crowe
